Whole House Remodel

2

Sean Carter Photography

3252 W. Huron River Drive, Ann Arbor

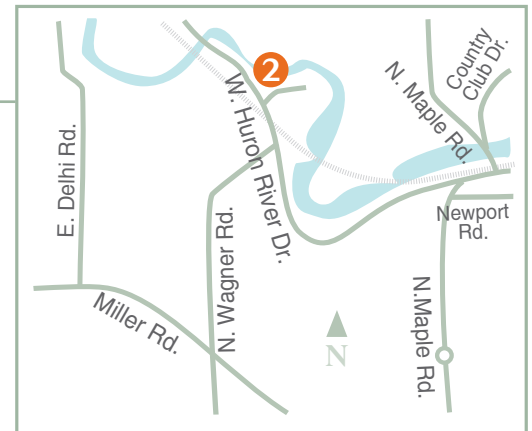

A PLACID PANORAMA

Set in a quiet stretch of the Huron River, this stunning home was built to take in everything this picturesque lot has to offer. Originally built in the '70s as a vacation spot and then remodeled in the '90s, this home was able to take advantage of the generous setback requirements of the time allowing for decks and a curved bay of windows that are cantilevered towards the river - beckoning all that enter the home.

Our clients purchased the house in 2015 and approached Meadowlark to help bring the home into the new century. A redesign of the kitchen to maximize the river views along with a reconfiguration of the Master Suite and mudroom areas and updates to all of the bathrooms left no part of this home untouched during this whole-home remodel.

About Meadowlark Design+Build

We combine architectural design with the best in building construction to create quality homes and remodels that are healthy, comfortable and energy-efficient. Based in Ann Arbor, Meadowlark is a nationally recognized design-build firm with extensive experience in green construction. On time and on budget, our work is backed up with a three-year bumper-to-bumper warranty for your peace of mind.

This home is located on Huron River Drive just west of Wagner Road. Cross the railroad tracks and take first right onto W. Huron River Drive. The home is on the left.
