

ALPHA DESIGN + BUILD

Kitchen Remodel and First Floor Layout Alterations

3

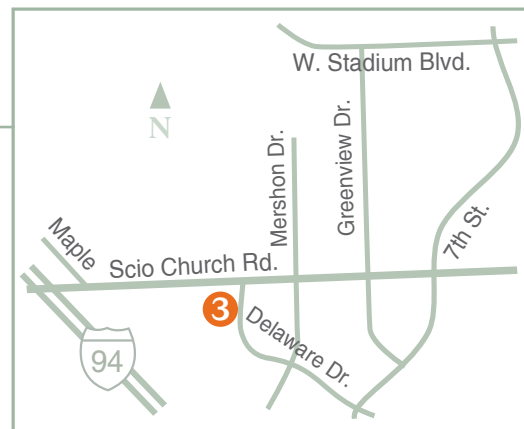

Michael Christie Photography

2030 Delaware Drive, Ann Arbor

This 1960's home was in need of some help to stay up with the open floor plans of today. Holding captive 4 independent rooms on the first floor, the layout was no longer working for the family of four. The homeowners came in with some great ideas and working closely with Sheryl (Alpha's designer) came up with a floor plan and amenities that fit the bill. Both bearing and non bearing walls were removed requiring redirection of electrical, plumbing, heating and cold air ducts. A main support beam was added to further open up the space and create a flow that allows for family interaction as well as a great entertaining space. A brand new kitchen layout featuring Pioneer cabinets, high end appliances, Quartz Countertops and LED lighting brought this home into modern times.

About Alpha Design+Build

Alpha Design+Build is one of Ann Arbor's premiere remodeling companies. We have built our reputation around hundreds of successful projects over the past 28 years. Our clients expect friendly and professional service with projects developed and delivered in unsurpassed excellence. Let us make you smile, give us a call.

This home is located on the south side of Scio Church Road just east of Maple and west of 7th Street. From Scio Church Road turn onto Delaware Drive. The home is on the right side.
