ABOUT THE HOME

Architectural Resource and Adaptive Building Solutions are extremely pleased to share with you a very special home. This project, christened “Pond Hill”, is located in the downtown area of Northville, sensitively sited with a lovely view capitalizing on a serene natural setting overlooking a pond. Pond Hill is a unique, sustainable, ultra-green, gas-free/all-electric, high-performance new construction home. This home has been registered with the United States Green Building Council’s LEED for Homes program with the certification goal of Platinum - the highest level of certification possible. It also has been designed to be a NET ZERO ENERGY home - generating over the course of the year as much energy as it needs - creating an ENERGY-FREE FUTURE for our clients.

Additionally, this home has been designed embracing Aging-In-Place principles, allowing it to comfortably accommodate our clients as they move through life, no matter what life might have in store for them.

Come see cutting-edge sustainability married to contemporary style and elegance. Learn what constitutes a high-performance home and take away inspiration for your own project. The Homes of the Future - Today®
