3-D Rendering by Alpha Design+Build

## 300 Riverview Drive, Ann Arbor

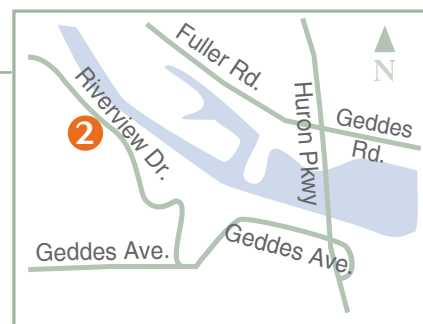

This home is a classic, split-level, Ann Arbor mid-century modern home situated among the trees near the Huron River. Typical of the time period, the kitchen and dining rooms were compartmentalized resulting in a centralized small, box-shaped kitchen that no longer served the family's needs. The goal of this project was to expand/open the kitchen to take advantage of the gorgeous views of the forest in the backyard. The tiny kitchen had the original build-in cabinetry that was falling apart, soffits with low ceilings, fluorescent lights fixtures and an outdated Corian countertop.

The new kitchen pays homage to the mid-century style by replacing the old white cabinets with textured laminate, reflective of the natural color tones of the time. To not become overwhelming with one color, painted white upper cabinets were mixed in on the back wall, along with herringbone hand-crafted white subway tiles. The clients wanted to incorporate shades of blue, so navy was chosen for the wine racks and bookcases that showcase the family's travels and interests.

A durable grey-veined quartz countertop with a snack bar overhang completes the massive island where the family can enjoy meals and homework time together in this open, clean-lined, modern kitchen.

### About Alpha Design+Build

Alpha Design + Build is one of the area's premier custom remodelers. The Design-Build method, built on collaboration and communication, unifies the designer and builder as a single entity. Our team includes professional designers, project managers, and master carpenters working together to provide beautiful custom living spaces and ensuring our clients have smiles on their faces from start to finish!

From Geddes Ave., west of Huron River Drive, turn onto Riverview going north. The home is on the left.
