2248 Delaware Drive, Ann Arbor

Imagine loving the process, loving the team, and loving your home again. At Forward Design Build Remodel in Ann Arbor, our passion is to help you live better in your home. Our professional and experienced team ensures the entire process is smooth, transparent and enjoyable through each phase.

In this interior remodel, our clients wanted to connect the kitchen with the family room for ease of conversation across the room while entertaining, cooking, reading and spending time together. Our clients also wanted to improve the functional working area for two cooks in the kitchen. Overall, the finishes needed a refresh and our clients were ready for a completely updated look.

Our plan to connect the kitchen and family room included eliminating most of the wall between the spaces and adding a peninsula island that would serve as working space on the kitchen side, and seating on the family room side. Our design also included new lighting, new furniture, and new flooring throughout the first floor. We also remodeled an upstairs guest bath, and a first floor powder room.

As a finishing phase of this project, our clients worked with our furnishings team to update the family room decor. Seating, side tables, lighting and a rug were purchased through our interior furnishing service. We also provided fabrics for custom cushions at the kitchen window seat. This was an exciting opportunity to provide a holistic final design that considered furniture.

From Main Street in Ann Arbor, turn right onto Scio Church Rd. Turn left onto Delaware Drive. The home will be on the left.
