1739 Sheridan Drive, Ann Arbor

#TheLanai

Mid-century modern with a Slim Aaron's flare, this Ann Arbor Hills ranch has been completely transformed to fit our Ann-Arbor-native client's lifestyle. After relocating from Hawaii, our clients feel a deep connection with nature and a desire to bring the outdoors in. Large windows and glass doorways create the feeling of nature immersion, all while serving as the perfect seasonal art. Warm wood beams and an asymmetrical fireplace focal point give this modern space a minimalist coastal nod. Now aligning with Ann Arbor's premier neighborhood features, #TheLanai displays mature landscape, mid-century lines and luxury features.

We stripped this space to the studs, removed walls, installed all new mechanicals, windows, and converted old semi-finished space to highly functional and livable square footage. Every square inch of this space has been completely renovated and upgraded to luxury. From rough construction to final furnishings and staging, our full-service design build team created a cohesive design and expertly managed this massive project from start to finish.

See more of this massive transformation and browse our other projects on social @bluezonespaces.
