2103 Copley Ave., Ann Arbor

Imagine loving the process, loving the team, and loving your home again. At Forward Design Build Remodel in Ann Arbor, our passion is to help you live better in your home. Our professional and experienced team ensures the entire process is smooth, transparent and enjoyable through each phase.

Our clients came to us wanting to create a kitchen that better served their day-to-day, to add a powder room so that guests were not using their primary bathroom, and to give a refresh to their primary bathroom. They sought to make their kitchen more functional to them and utilize the space in a better way. One feature in the kitchen that they wanted to include was bar seating for less formal dining. Our design plan consisted of reimagining the kitchen space, adding a powder room and creating a primary bathroom that delighted our clients.

In the kitchen we created more integrated pantry space. We added a large island which allowed the homeowners to maintain seating within the kitchen and utilized the excess circulation space that was there previously. To add in the powder room we took space from a third bedroom and tied into the existing plumbing and electrical from the basement.

From Washtenaw Ave., take Brockman Blvd. south. Turn right onto Copley Ave. The home will be on your right side.
