

# Riemco Design + Build

## Historic Home Remodel

1

**IN-PERSON TOURS Friday, Saturday & Sunday 12-6pm (10/15-10/17)**

Riemco Design + Build's dynamic approach to design has led to homes ranging from historic recreations to modern gems. This year's focus is on traditional, small town, family-oriented homes.

This lovely example Folk Victorian architecture was put to the test when two families were blended under one roof. As with many homes of its era, the layout was full of separate rooms that did not align with current living styles. The original footprint had to be maintained for the creation of an eat-in kitchen, family entrance, and master suite. The charisma of this 140-year-old home was upheld while adding modern functionality for a family of seven. The results speak for themselves.

- A gourmet kitchen made for entertaining
- A Master Suite designed to be a soothing retreat
- Hand-crafted cabinetry with attention to every detail
- A spacious and inclusive dining area
- New connection to the outdoor living areas
- Cleverly fashioned storage for the owners' entrance
- Recreations of the existing trim throughout the addition
- Built-in bookshelves and a new fireplace for the den
- Restoration and extension of the Brazilian Cherry flooring

**124 W. Summit Street, Chelsea**  
*True to Its Roots*

Off Main St (M-52), go west on Summit Street. The home is on the right (north side).
