

REGISTER FOR OUR PRESENTATION - Saturday, June 25 • 10:30am -12:30pm

Mallets Creek Library - Ann Arbor District • 3090 E. Eisenhower Pkwy. Panel presentation with participants #7, #8, & #9.

GREEN DESIGN FROM THE GROUND UP

How can you get the best long-term value from your new home or remodel? Energy-efficiency measures are not just the only upgrades that will give you a return on investment over time, they are also the key to a more comfortable and healthy home. Make sure your next project makes a home that is future ready.

In this session we will explore:

- How to make your home resilient in cases of utility disruptions
- Proven products and techniques that get results without breaking the bank
- Über-efficient HVAC and plumbing systems that improve your living experience
- One thing every homeowner should ensure is included in their project

Doug Selby is a founding partner of Meadowlark Design+Build and the Sustainability Director for the company. With 20 years of experience engineering and building deep energy homes, Doug will share with you not only the path to zero-energy houses, but also common-sense techniques that have a huge impact on comfort and energy consumption for a small added investment. Doug is a Certified Passive House Consultant.

DESIGN TRENDS & FINISHES THAT MAXIMIZE YOUR INVESTMENT

Jennifer
Hinesman
Design
Director

A project starts with great design for your lifestyle and a good plan for building, but that is not the end of the story. Literally thousands of products go into the making of a home, and they have a huge impact on not only the final price of constructing a home, but also long-term maintenance and how well the home holds its value. Join Jen Hinesman as she talks about strategies to maximize your enjoyment of your new home for the long-term:

- The design-build approach and building your team
- Getting the most out of your finish details
- Colors, textures and flow in a home

Jen is a graduate of U of M's Taubman Center for Architecture and Urban Planning with 9+ years of experience at Meadowlark Design + Build. She loves residential design and how a great space can really impact the quality of daily life. In her time with Meadowlark, Jen has enjoyed working from the concept stage all the way through to the finishing touches and finds building personal relationships with homeowners to be the most rewarding part of the design experience.

Visit www.meadowlarkbuilders.com to learn more about our work and our team, and come ask questions at the "ABCs of Designing and Building Your Dream Home" panel presentation.
