About Forward Design Build Remodel

Imagine loving the process, loving the team, and loving your home again. At Forward Design Build Remodel, our passion is to help you live better in your home. Our professional and experienced team ensures the entire process is smooth, transparent and enjoyable through each phase.

About the Project

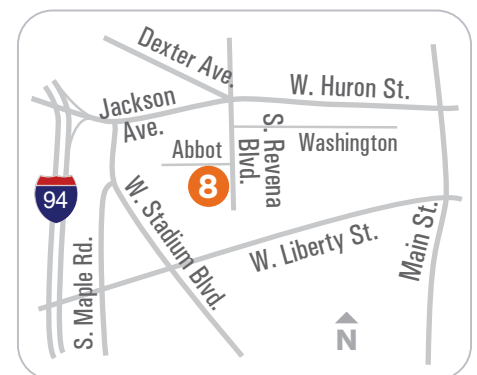

Our clients came to us wanting to increase their living and entertaining spaces while working within the confines of a minimal lot size in the Eberwhite neighborhood. They sought to create an attached outdoor refuge, as well as a detached hobby space. A dominant feature of the accessory dwelling unit would be a custom golf simulator. Our design plan consisted of adding a screened-in porch to the existing home with backyard views as well as adding livable space above an existing garage.

The screened-in porch design creates a three season space for entertaining guests while grilling and watching their kids enjoy the backyard. A short walkway to the accessory dwelling unit also allows easy access for their guests to go upstairs and partake in the state of the art golf simulation. A kitchenette and half bath in the upstairs space adds comfort for this to be an additional hosting or work area. Modern transitional selections coordinate with the downtown home's existing style.
