### ABOUT THE PROJECT

The ground level of this charming, historic Old West Side remodel features an inviting open kitchen and dining area, along with a brand new deck for outdoor relaxation. Upstairs, you'll find a thoughtfully updated primary bath, along with several beautiful built-ins in both the office and sitting room.

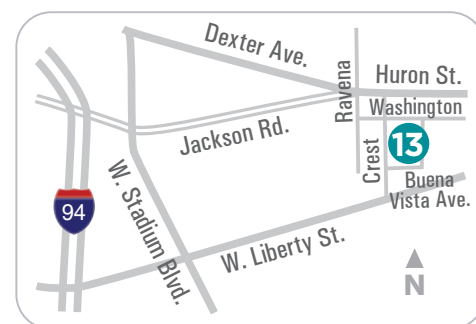

The kitchen and dining area were completely transformed by removing a dividing wall, creating a seamless flow between the two spaces. The kitchen features custom cabinetry, with a section that wraps around a corner, further unifying the area. New french doors and a set of new windows allow for more natural light throughout.

While the primary bathroom was on the smaller side, the reconfiguration of the space along with the addition of angled skylights helps to bring in more natural light and create a spacious feel. The blend of modern finishes with historic, timeless charm help make this home truly special.

### ABOUT CENTER DESIGN + BUILD

Center Design + Build is a design-focused build company. Our mission is to craft beautiful and thoughtful spaces that impact how people live and function in them. Follow us on Instagram: @centerdesignbuild

### 226 Buena Vista Ave. Ann Arbor
